

# TOP 7 | SCULPSURE FAQ'S

## CAN YOU REPEAT THE TREATMENT IN THE SAME AREA?

Absolutely! After six weeks, patients can come back in for further treatment.

Each treatment reduces body fat in the area by up to 24%, so some areas will benefit from multiple treatments, while others get the desired results the very first time.

## HOW LONG DOES A SCULPSURE VISIT TAKE?

SculpSure treatments only take 25 minutes and patients can return to their normal activities immediately after treatment. Because these visits are so quick and easy, they're easy to schedule during a lunch hour or in between your everyday activities.

## WHEN WILL I SEE RESULTS?

Patients might begin seeing results as early as six weeks, but the treated area may continue to change for as long as 12 weeks after treatment. Every body is different, and the rate of results will depend on many variables.

## HOW LONG DO RESULTS LAST?

SculpSure results are permanent. Now of course, we can't prevent you from gaining weight (and fat). But once an area has been treated, the fat cells have been destroyed and they won't come back, as long as you maintain your current weight.

## IS IT SAFE?

SculpSure is FDA approved and has been used on thousands of happy, satisfied patients. Because SculpSure is non-invasive, you don't have to worry about the risks of anesthesia or surgery.

## DOES SCULPSURE HURT?

Our patients describe the feeling of SculpSure as 'tingling' or 'pins and needles', and the sensation of alternating hot and cold. While most of our patients only experience very mild discomfort, there is some wiggle room if you find the procedure to be too uncomfortable. We can reduce the intensity of the treatment, to an extent, while remaining effective. Pain should be the least of your concerns!

## HOW MUCH DOES A TREATMENT COST?

SculpSure is priced by treatment area. Meaning, patients will need to come in for a consultation for an accurate price quote. We offer discounted pricing when patients book multiple areas at one time, and we'll work with your body contouring goals to make sure your time and money are spent the best way possible!
